## INTRODUCTION

The Ministry of Health and Long-Term Care Residence Coding Manual presents a classification system for patient residence information. This coding system provides a framework to determine referral patterns to various health care facilities as well as a means to determine the geographical spread of diseases.

A unique four-digit number has been assigned to each municipality and populated Indian Reserve or Settlement in the province. Where an area is not municipally organized, the four-digit number refers to one or a grouping of census enumeration areas.

The first two digits of the code represent the county, district or regional municipality in which the place is located. Digits three and four identify municipalities within the county, or areas of the county if the area is not municipally organized, or Indian Reserves and Settlements.

The importance of correct coding cannot be over emphasized. Residence Coding provides part of the basis for hospital and other facility's planning and funding, as well as a crucial part in disease surveillance, public health expenditures, physician referral patterns and other community based services.

The key to good coding requires a thorough understanding and correct application of the information contained in this book.

Please note that due to space limitations on field lengths, some municipality names have been truncated or abbreviated and do not necessarily constitute legal names.

## GENERAL INFORMATION

### ***Alphabetic Listing***

The manual contains place names in Ontario listed alphabetically with code numbers, and also code numbers for all other Provinces of Canada, the States of New York, Minnesota, and Michigan, U.S.A. Remaining, and World Remaining.

### ***Numeric Listing***

This manual, like the previous edition, includes an abbreviated numeric code listing in the back of the book for the purpose of reading encoded material. It is abbreviated in the sense that it includes only **one place name** for each code number.

### ***Key to Abbreviated Numeric Listing***

The last five pages in the manual list the counties, districts and regional municipalities of Ontario, the provinces of Canada and identified areas of the United States, together with the code numbers that identify the District Health Council, and the Ministry of Health and Long-Term Care region.

### ***Local Government Changes***

The listing of residence codes is updated regularly to incorporate changes in Ontario boundaries as well as status of Ontario municipalities. This edition of the Residence Coding Manual includes changes that have taken place up to and including January 1, 2003.

If you have any questions, please contact:

Ministry of Health and Long-Term Care  
Finance & Information Management Branch  
Information Management Unit  
5700 Yonge Street, 4<sup>th</sup> Floor  
Toronto, Ontario M2M 4K5

Telephone: (416) 327-7773

## CODING PROCEDURES

### ***How to select the correct code***

There are many duplicate and triplicate place names in Ontario. When using the alphabetical listing, care must be taken to read the entire line of the listing, and to compare all listings with the same place name.

The following is an example of a listing for a place name that is common to more than one place:

Place	Type	Municipality or Township	County or Other	Code
Baldwin	TP		Sudbury	4804
Baldwin		Georgina	York	3907

The 'Municipality or Township' and 'County' columns give information concerning location. The 'Municipality' column will identify the location of the community. The 'Type' column tells the type of place – i.e. a city, town, village, township, Indian Reserve, etc. A blank in the 'Type' column indicates an unincorporated community. There are thirteen possible abbreviations found in the 'Type' column. See listing on page v.

**In this edition, Ontario county/district residence codes ending with '00' have been removed.** Residence code numbers ending in '00' refer to unidentified municipality, which cannot be included in the referral pattern for any hospital. The municipality code is required since referral patterns are traced to the local municipality level where they can be matched with the corresponding population projection. Coding '00' for the municipality could result in a hospital receiving less credit than it deserves. Similarly, a localized pattern of disease may be masked in the county total or the whole county may be unfairly labelled with a health problem when it is really an isolated area of occurrence.

## ***Aids to coding***

- ◆ Place names (but not postal addresses) can be located alphabetically within the manual.
- ◆ Rural route numbers and box numbers do not provide sufficient residence information for locating the correct code. The residence of the patient to be coded is the patient's **municipal residence, not postal address**. For these postal addresses, it is necessary to learn the city, town, village or township in which the patient resides. For example: R.R.1 Wyoming, Ontario is located within Enniskillen Township, Lambton County, and should be coded with the number for Enniskillen Township. If necessary, verify residence information with the patient or the patient's family.
- ◆ Tourists are classified according to their permanent residence. If the permanent residence is outside Ontario, refer to sections 2-3 of the Alphabetic Listing. For patients with no permanent address, assign the code of the place/municipality where the patient is living at the time the service is provided.
- ◆ Indian Reserves and Indian Settlements are listed by the name of the settlement in the Alphabetic Listing (Saugeen 29 IR Bruce 0232). For this manual, only those Indian Reserves or Settlements recognized by Statistics Canada are given a unique number. All other Indian Reserves or Settlements are grouped under the appropriate code, usually a neighbouring reserve or settlement owned by the same band. For those places not given a unique code, refer to the Alphabetic Listing of this manual.
- ◆ Unorganized and unsurveyed areas in districts of Northern Ontario are identified with one code per district. For patients living in named settlements of unorganized areas, a code is listed by name of the settlement. For patients who do not reside in a settlement, or an organized or surveyed municipality, a code is provided for the name of the district and denoted as 'unsurveyed'. Look up the settlement name in the Alphabetic Listing to obtain the residence code.

Example:

Place	Type	Municipality or Township	County or Other	Code
Albany Post		Unorg.	Cochrane	4199
Algoma District	UN	Unsurveyed Area	Algoma	4099

## ABBREVIATIONS FOR TYPE OF PLACE

C	.....	City
CO	.....	County
DS	.....	District
IR	.....	Indian Reserve
IS	.....	Indian Settlement
M	.....	Municipality (Single Tier)
PR	.....	Province (Canada)
RG	.....	Regional Municipality (District Municipality) (Region)
ST	.....	State (U.S.)
T	.....	Town
TP	.....	Township
UN	.....	Unorganized
V	.....	Village
